PDF Formulare - Funktionen

Formular per Mail versenden & Inhalte aus dem Formular in Header und Body schreiben

```
var c_ID =  this.getField('CustomerID').value;

var c_name =  this.getField('CustomerName').value;

var c_land =  this.getField('CustomerCountry').value;

var betreff = 'Kundennummer: ' + c_ID + ' / Name: ' + c_name + " / Land: " + c_land;

var body = 'Das ist der Body der Nachricht';

this.mailDoc(false, "empfaenger@domain.de", "", "", betreff, body );
```

Ergänzung zum obigen Beispiel / Erklärung der Parameter der Funktion *mailDoc*

```
bUI  - (optional) If true (the default), the rest of the parameters are used in a
compose-new-message window that is displayed to the user. If false, the cTo
parameter is required and all others are optional.
Note: (Acrobat 7.0) When this method is executed in a non-privileged context, the
bUI parameter is not honored and defaults to true. See Privileged versus
non-privileged context.

cTo (optional)  - The semicolon-delimited list of recipients for the message.
cCc (optional) - The semicolon-delimited list of CC recipients for the message.
cBcc (optional) - The semicolon-delimited list of BCC recipients for the message.
cSubject (optional) -  The subject of the message. The length limit is 64 KB.
cMsg (optional) - The content of the message. The length limit is 64 KB.
```

Beispielcode (gefunden im Internet)

```
var Name = this.getField('Name01').value;
var Kst = this.getField('Kosten').value;
var EMail = this.getField('E-Mail-Adresse01').value;
```

```
var Standort = this.getField('Ort').value;

var Beschreibung = this.getField('Eindeutige Beschreibung').value;

var Wdatum = this.getField('Wunschdatum').value;

var Edatum = this.getField('Erstellungsdatum').value;

var DDR = this.getField('Drop-Down-Liste').valueAsString;

var Betreff = DDR + "_" + Standort + "_" + Name;

var msg = Name + "\n" + Kst + "\n" + EMail + "\n" + DDR + "\n" + Standort + "\n" +

Beschreibung + "\n" + Wdatum + "\n" + Edatum + "\n" + "\n\nViele Grüße\n";

this.mailDoc({bUI: true, cTo: DDR, cCC: EMail, cBcc: "", cSubject: Betreff, cMsg: msg});
```

Formular drucken per Button

```
this.print(true); //Zeigt Druckdialog an

this.print(false); //Zeigt Druckdialog nicht an

this.print(false, this.pageNum, this.pageNum); //Druckt aktuelle Seite
```
